BACK TO THE FUTURE!

TOP TECH TRENDS OF 2023

Words By: Aamir Kholam

The digital world evolves at a rapid pace. Only a few decades back, connecting to the internet required a dial-up modem and took a lot of time to load even the most basic website. Now people are constantly connected to the internet and practically live there thanks to social media and other engaging applications. As of now, with the help of UPI, even a local vegetable vendor is being able to support their business by connecting to high-end technology and big businesses definitely need to keep up with it to adapt to the rapid changes and stay competitive in the long run.

The major layoffs in the tech industry were clearly a hit to the advancement of new tech trends. However, the already-established tech trends are expected to thrive to a whole new degree in 2023. The latest and emerging technologies held more value than ever as the digital domain trumped over several others. Below is a list of the top tech trends of 2023 followed by a brief look at the tech trends of 2022 -

**ALWAYS
EXPLORING THE
IMPOSSIBLE**

Boldness is not something that one is born with, but with constant perseverance and dedicated efforts, you churn out your best. Let's unfold and get superbold as the boldest from their respective fields join hands for our December issue - the off-road maestro, which screams lifestyle like nothing else on the road - the All-New Mahindra Thar that now also comes with Rear Wheel Drive option, and the Bollywood star who always grabs eyeballs with her bold looks, Vaani Kapoor.
